

Cognitive Function in Children with Prader-Willi Syndrome

Researchers in the Division of Pediatric Endocrinology at the University of Alberta are investigating cognitive function in children with Prader-Willi Syndrome.

We are asking 20 families of children with Prader-Willi Syndrome ages 5-17 years to participate in this study. This study will involve two visits to the University of Alberta.

For more information or to see if your child qualifies, please contact Michelle Mackenzie by phone at (780) 407-7241 or by email at michelle.mackenzie@ualberta.ca.
